

Hakob Julfayan

Senior QA Engineer

Yerevan, Armenia | +374 (94) 492003 | julfayanhakob91@gmail.com

Professional Summary

I am an accomplished Senior QA Engineer with 10+ years of experience leading end-to-end quality assurance, test automation, and release management across web, mobile, and cloud environments. I have a proven track record of reducing production defect rates, streamlining CI/CD pipelines, and driving cross-functional quality standards. Besides strong QA fundamentals, I bring 3+ years of hands-on experience in Data Science and Data Quality testing—focusing on tabular data analysis, predictive modeling and data and model quality validation.

Skills

- **Test Automation & QA:** Playwright, Selenium, Pytest, Gherkin, Page Object Model (POM), Postman, Charles Proxy, Swagger, TestRail, Zephyr.
- **Programming Languages & Scripting:** Python, Java, JavaScript, Bash, SQL.
- **AI tools and techniques:** Claude Code, Model Context Protocol (MCP), GitHub Copilot, OpenSpec, Prompt Engineering.
- **DevOps & Cloud:** Docker, Jenkins, Git, Kubernetes, Ansible, Azure Databricks, Azure Data Lake Storage (ADLS).
- **Data & Machine Learning:** PySpark, PyTorch, Pandas, NumPy, Matplotlib, Seaborn.
- **Soft Skills:** Analytical, Proactive, Troubleshooting mindset, Collaborative.
- **Languages:** Armenian, English, Russian.

Professional experience

Senior Quality Engineer | August 2025 - July 2026

Acronis • Switzerland (remote from Armenia)

- Built UI automation with Playwright (Python), Pytest, and Gherkin using POM architecture; automated 50+ cases.
- Reported ~80 reproducible bugs and drove ~200 tracked issues: functional, localization, UX, API, and deployment defects.
- Performed REST API and RAML contract testing, plus security validation (cookies, sessions, etc.) and DB-migration review.
- Managed component staging builds and ran production rollouts across 40+ datacenters.
- Integrated AI agents (Claude code) and MCP tooling across the QA lifecycle — test authoring, bug verification, and automated code review — building repeatable, consistent workflows.
- Delivered 10+ peer-reviewed pull requests, turning review feedback into reusable team conventions.

Strong Middle QA Engineer | December 2022 - August 2025

DataArt • Yerevan, Armenia

- Led testing for a web and iOS ecommerce platform utilizing TestRail to manage and execute test cases, resulting in a 50% reduction in production defects.
- Improved QA processes and expanded test coverage by 25%, raising test pass rate from 80% to 95%.
- Mentored 2 junior QA engineers on API testing, using Swagger and Postman, increasing team productivity.
- Developed automated regression and smoke test suites using Selenium, Pytest, and Page Object Model design patterns, reducing manual testing effort by 60%.
- Used Python requests library for API automation, increasing API stability.
- Used SQL queries to verify data consistency between UI inputs and database records.

Data Scientist / Data QA Engineer | July 2019 - November 2022

PicsArt • Yerevan, Armenia

- Leveraged Azure Databricks to query, process, and validate large-scale raw user activity logs stored in Azure Data Lake Storage (ADLS).
- Developed and tested a user content diversification algorithm using Python, SQL, and Seaborn, verifying data logic to drive a 50% increase in user engagement.
- Developed and tested an anomaly detection algorithm using Python, Pandas, Matplotlib, and ARIMA/SARIMA models on user crash data, increasing crash detection accuracy by 25%.
- Developed and tested a user trend detection algorithm using Python, PySpark, and NumPy to power marketing insights, cutting manual analysis workload by 40%.

QA Engineer | January 2018 - July 2019

PicsArt • Yerevan, Armenia

- Created 150+ test cases for android and ios apps using Zephyr, reducing production bug rate by 60%.
- Performed API testing using Postman and Charles Proxy decreasing the percentage of UI bugs.
- Wrote and maintained automation tests using Java, Appium and Jenkins improving test efficiency and enabling faster feedback loop.
- Performed exploratory testing, increasing UX stability and discovering bugs for high severity scenarios.
- Performed sanity testing before release, minimizing production bugs and ensuring stable deployments.

QA Engineer | April 2015 - December 2017

Energize Global Services • Yerevan, Armenia

- Collaborated with Belgium-based team via online meetings to align on requirements and testing priorities.
- Created comprehensive end-to-end test plans and test cases for POS terminal projects using HP ALM, ensuring full coverage of payment flows and transactions.
- Executed end-to-end test cases on HP ALM for an online banking system, validating main workflows across web platforms.

QA Intern | Oct. 2012 - March 2015

Synopsys • Yerevan, Armenia

- Added manual test cases for new features into the regression test framework increasing test coverage of software.
- Automated test cases for new features and added them into the regression test suite increasing test coverage.
- Translated Linux-based test cases for Windows environment expanding chip design tool across different platforms.
- Developed automated test scripts to generate comprehensive test case reports, using python and bash scripting.
- Analysed automated HTML test reports from nightly builds and scheduled CI/CD runs created by the Synopsys internal team to identify regressions early and improving release quality.

Education

PhD, Institute of Radiophysics, 2014 - 2017

National Academy of Sciences

Master's Degree, Microwave Engineering, Faculty of Radiophysics, 2012 - 2014

Yerevan State University

Bachelor's degree, Radio physics and Electronics, Faculty of Radiophysics, 2008 - 2012

Yerevan State University
